

Cuda Provides Easy Parts Cleaning for the **AEROSPACE INDUSTRY**

Cuda Automatic Parts Washers use pressurized hot water and industrial detergents to clean parts automatically.

Whether it's jet engine repair or manufacturing, Cuda Automatic Parts Washers are ideal for cleaning oils, grease and other contaminants. Technicians can automatically clean anything from turbine blades to the tiniest bit of hardware, in minutes, with NO hand labor! If you have parts that need cleaning, a Cuda can help!

Powerful spray jets blast a solution of hot water and biodegradable detergent from the top, bottom and sides, to thoroughly clean the dirtiest parts — freeing workers to perform other profitable tasks. Special options are available to speed cleaning, as well as height extensions for oversized parts.

Cuda manufactures over 40 models of top-load or front-load automatic parts washers with load capacities ranging from 250 lbs. to 5,000 lbs.

For more information on Cuda Aqueous Parts Washers, please contact the dealer listed below.
